Offer

### **An innovative English language learning methodology specifically designed for Chinese students.**

Our vision is to help Chinese children and teenagers to learn English with an innovative, fast, age-appropriate, accessible English reading, spelling and pronunciation solution specifically-designed for Chinese children who are struggling to read and pronounce English words.

Our programme, specifically teaches Chinese students from the age of eight to adult how to read/spell and pronounce English words independently using an age-appropriate, culturally specific phonics course. We also give teachers the know-how to teach the course through simple to use materials. Unlike other books/programmes, our books are designed specifically for the Chinese market.

## **Cooperation Offered**

- 1. Sales / Distribution**
- 2. License agreement**
